- VIII. Executive Session (if required) (1 VSA 313; Contracts, Real Estate, Personnel, Litigation) (Mot. Req.)**
 - a. Litigation and Labor Agreements

In accordance with Vermont's Open Meeting Law requirements, I move that the Board find that premature general knowledge of the discussion of *litigation and labor agreements* would

clearly place the Selectboard at a substantial disadvantage, because the Selectboard risks disclosing its approach to the litigation and labor agreements if it discusses these items in public. I further move that the Board enter into Executive Session to discuss *litigation and labor agreements*, under the provisions of Title 1, Section 313(a) (1) of the Vermont Statutes and that the Town Manager, Planning and Development Director and attorney for the Town be authorized to attend.

INTEROFFICE MEMORANDUM

To: Patrick McQueen
From: Richard Menge, P.E., Director of Public Works
Subject: Mapping Request
Date: March 23, 2015

Public works strives to improve service and meet increasing expectations of the public. One of the most important issues to this department is the ability to locate and accurately depict the Town's and to some extent private water, sewer and drainage assets. Though not specifically budgeted this year, we have the opportunity through a new State Water Grant to improve the level of detail of our mapping to include higher accuracy and resolution to enable high level planning and even construction design quality. This memo is to request funding of a mapping program for the water and sewer utility service area for Hartford, Wilder and White River Junction. Given the new state grant program and the need to perform the aerial photography work before the trees set their leaves, we are making this request on an expedited basis.

This fiscal year the Utility Department retires 3 employees with a combined experience of over 100 years employment. Our top highway and water employees anticipate retirement in the next few years. The Town will effectively lose its most significant institutional memory in all utility fields. We would like to tap these resources before they leave the Town's employment and also stimulate and involve replacement staff persons with the tools to do their jobs.

Over the past ten years we have improved our mapping and included Hartford Village that previously had no sewer mapping. This next step involves aerial photogrammetry followed by surveyed ground control to develop mapping to a 1" = 40' scale plan and 2' contours. This process will provide the department accurate mapping with which we can fill in the details that cannot be provided from mapping that is provided at a scale of 1"=200'.

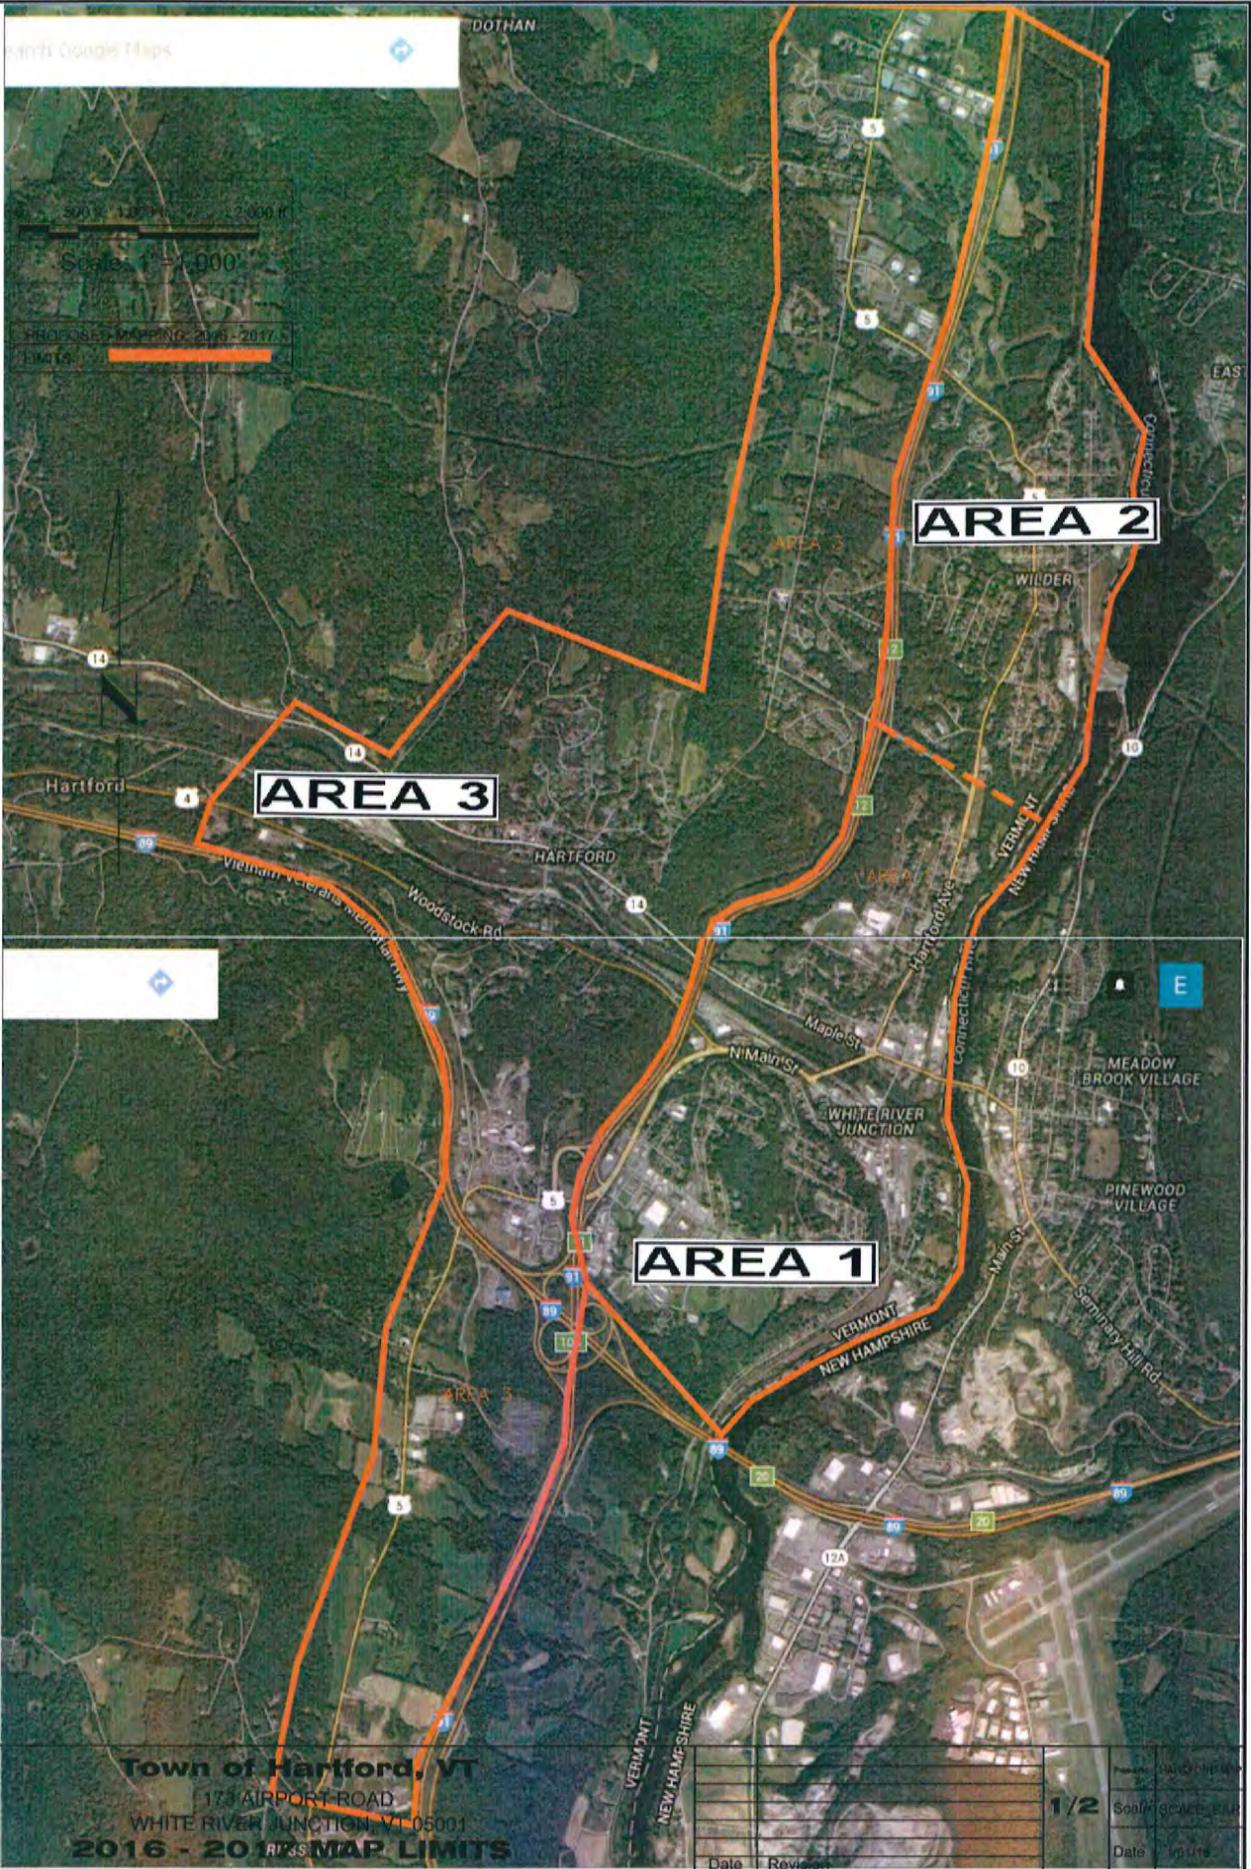

Some of the benefits of the mapping project include:

1. Provides better reference information for system maintenance and sufficient detail for future planning of the water, wastewater, stormwater and sidewalks.
2. Enables public works staff to input detailed water, sewer and drain lines information.
3. Ability to show existing features may lower future design engineering costs.
4. Allows development of updated numbered sewer and drainage manhole inventory mapping.
5. Provides a more accurate water system hydraulic model base map.
6. Will provide a detailed Fire Hydrant inventory map for use by fire department and others.
7. Will enable development of a Sidewalk Inventory map.
8. Provides mapping for annual paving contract (for areas that are mapped).
9. Provides a resource for determination of Drainage areas and impervious areas.
10. The separate color ortho photography and line work base map layers can be used by property owners, other Town Departments and the Regional Planning Commission.

We estimate the cost to complete this project is \$80,000. In order to complete the aerial flights this spring we request approval to spend an initial \$16,000 to be paid for by the water and sewer

systems. We are also investigating having the aerial flight with work completed in conjunction with State of Vermont Center for Geographic Information flights that will be conducted this spring. This may result in significant savings. Attached is a location plan for the work and a breakdown of costs.

We request Selectboard approval to proceed with this program to expend an estimated \$80,000 for the purpose of developing detailed mapping of the White River Junction, Hartford and Wilder water and sewer service areas.

COLOR ORTHOPHOTOGRAPHY & TOPOGRAPHIC BASE MAP

The following is a budget proposal for topographic survey for the following Areas:

Area 1 = 1,200 acres (White River area to Bugbee Street – East side of Interstate 91)

Area 2 = 850 acres (Bugbee to Wilder - East side of Interstate 91)

Area 3 = 2,825 acres (Hartford Village - strip West of I91 from south end to Wilder)

Task	Description (2' contours; color orthos)	Areas 1-3 (4,875 Acres)
1	Control Points (Estimated cost utilizing airborne GPS)	\$6,000
2	Photography w/airborne GPS 1,800' (above mean terrain; 1":300' (1:3600) color film	\$10,000
3	Scanning/aerial triangulation; Full Detail Map; 2' Topo with color orthophotos	\$64,000
	Total	\$80,000 (16.41/AC)

Task 1: To be provided by a surveyor. Monuments to be provided by the Town (rebar, brass disk, manhole, etc.)

Task 2: The photography includes the plane/film in the can for all 3 Areas.

Task 3: Provided by a qualified Photogrammetrist.

Funding to be from Hartford water and sewer funds balance. Other possible funding sources include potential \$20,000 grant from ANR Drinking Water Asset Management Grant Division and potential \$20,000 State planning grant.

Project is anticipated to be phased over a 2 -3 year period.

Re: Citizen Survey

In Town Hall, we have not been able to locate any record of an agreement that the Town has entered into with the Survey Center to carry out the citizen survey. Therefore, I spoke with Zachary Azem at the UNH Survey Center again about this project. He confirmed that no agreement has been entered into between the Survey Center and the Town. However, he said they are ready to move forward and carry out the survey when the Town is ready.

Assuming that the Selectboard, which is confirming the Survey Committee appointments this evening, still wants to move forward with the UNH Survey Center, we will simply issue a Purchase Order to the Survey Center to formalize the agreement and get it moving.

Mr. Azem said he is ready to work with the Survey Committee either by phone or coming to Hartford from UNH to help flesh out the actual survey within their proposal cost for the project.
